

THE NEW ANGLE ON BLACK.

Enhanced cooking fume extraction, simpler cleaning and maintenance and more light in the cooking area. The new body angle lends this splendid Faber hood considerable advantages, but it's the design that will win you over. There's a strong contrast between glossy black glass rear panel and Matt black front panel, with a sophisticated and highly modern visual effect. With True Double Black, black has double the power.

To be installed at a minimum distance from the hob of 45 cm.

NEW
